PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building production-grade web and mobile applications powered by AI. Skilled in React, Node.js, Python, and mobile development across Android and iOS. Experienced in integrating AI agents, chatbots, and third-party APIs into real-world products. Strong architectural thinking with a daily AI-assisted workflow using Claude Code and Cursor — planning systems before coding to ship cleaner, faster, and more maintainable solutions.

EXPERIENCE

Associate Software Engineer — Full Stack Developer

Big Immersive, Lahore | Sep 2025 – Present

- Develop end-to-end features spanning database, API, and React UI, owning delivery from schema design to production.
- Design and update database schemas in PostgreSQL and Firebase, writing efficient queries to support frontend data needs.
- Implement JWT-based authentication and protected routes, including token handling and role-based access control.
- Implement responsive layouts across devices and partner with designers to balance usability and visual polish.
- Improve rendering performance by reducing unnecessary re-renders and applying targeted optimizations on both client and server.
- Built TwitterBuilder — a full-stack SaaS platform for Twitter growth with AI content generation, post scheduling, analytics, and Stripe billing. (Python, FastAPI, Next.js, PostgreSQL, Redis)
- Contributed to SoundBYTE — a luxury NFT and phygital art platform, owning the payment system, session management, audio-to-art pipeline, and Gelato print-on-demand integration. (React, Express.js, PostgreSQL, Stripe)
- Developed MyNeutron Android — a native Android client for an AI knowledge-graph assistant featuring real-time chat streaming, knowledge map visualization, and Google Sign-In. (Kotlin, Jetpack Compose, Firebase, MVVM)
- Built and shipped multiple consumer-facing mobile applications for Android and iOS with integrated AI chatbots and agents, including Poster AI and a Cooking Assistant app. (React, Vite, Firebase, Gemini AI)
